WEEKLY TERRITORIAL CHANGES

Module 7: Weekly Territorial Change Report (DeepStateMap)

According to DeepStateMap data, between 2025-11-11 and 2025-11-16, Russian and Ukrainian forces continued to contest territory along multiple fronts. Over this 7-day period, Russian gains amounted to 152.2 km², while Ukrainian gains reached 0.2 km². The largest Russian advances were observed in Zaporizhia Oblast (74.5 km²), Donetsk Oblast (53.4 km²), Kharkiv Oblast (19.7 km²). Meanwhile, Ukrainian forces achieved their most notable gains in Donetsk Oblast (0.2 km²), Kharkiv Oblast (0.0 km²), Dnipropetrovsk Oblast (0.0 km²). Overall, the most active oblasts during the week were Zaporizhia Oblast, Donetsk Oblast, Kharkiv Oblast. The peak day for Russian advances was 2025-11-13, while the peak day for Ukrainian advances was 2025-11-13.

Module 9: Top 3 Territorial Maps & Narratives (DeepStateMap)

RU Narrative:

According to DeepStateMap data between 2025-11-09 and 2025-11-16, the following territorial developments were observed for RU forces.

7-Day Comparative Summary

Over the past week, RU forces have gained a total of 161.67 km², with the top three territorial gains accounting for 88.56 km² (55% of the total). In comparison, the opposing side has gained 0.24 km² (top three gains: 0.24 km²).

RU Top Territorial Changes Narrative

The #1 largest gain by RU forces covers approximately 64.23 km², which represents about 40% of total gains this week. Currently, the gain affects the settlements: Новомиколаївка, Нове, Новоуспенівське, Рівнопілля. If the advance continues, the following settlements may soon fall within the contested area: Солодке, Успенівка. The #2 largest gain by RU forces covers approximately 12.41 km², which represents about 8% of total gains this week. Currently, the gain affects the settlement Чунишине. If the advance continues, the following settlements may soon fall within the contested area: Зелене, Даченське, Гнатівка. The #3 largest gain by RU

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

forces covers approximately 11.92 km², which represents about 7% of total gains this week. Currently, no settlements are affected by this gain. No additional settlements are predicted to be affected in the near future.

UA Narrative:

According to DeepStateMap data between 2025-11-09 and 2025-11-16, the following territorial developments were observed for UA forces.

7-Day Comparative Summary

Over the past week, UA forces have gained a total of 0.24 km², with the top three territorial gains accounting for 0.24 km² (100% of the total). In comparison, the opposing side has gained 161.67 km² (top three gains: 88.56 km²).

UA Top Territorial Changes Narrative

The #1 largest gain by UA forces covers approximately 0.22 km², which represents about 90% of total gains this week. Currently, no settlements are affected by this gain. No additional settlements are predicted to be affected in the near future. The #2 largest gain by UA forces covers approximately 0.02 km², which represents about 10% of total gains this week. Currently,

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

no settlements are affected by this gain. No additional settlements are predicted to be affected in the near future. The #3 largest gain by UA forces covers approximately 0.00 km², which represents about 0% of total gains this week. Currently, no settlements are affected by this gain. No additional settlements are predicted to be affected in the near future.

Module 4: Settlements (DeepStateMap) — Narrative

According to data reported by the DeepStateMap project, between 2025-11-10 to 2025-11-16, the following territorial developments were observed:

Russian forces expanded their control between 2025-11-10 to 2025-11-16, with Russia gaining 364.3 km² (42.3% more than the previous week, which was 256.0 km²), and Ukraine gaining 1.7 km² (94.9% less than the previous week, which was 32.8 km²).

The most occupied oblast was Zaporizhia Oblast (Новомиколаївка, Нове, Новоуспенівське, Рівнопілля). Newly occupied settlements include: Катеринівка (village, Donetsk Oblast), Нове (village, Zaporizhia Oblast), Новомиколаївка (village, Zaporizhia Oblast), Новоуспенівське (village, Zaporizhia Oblast), Рівнопілля (village, Zaporizhia Oblast), Середнє (village, Donetsk Oblast), Степова Новоселівка (village, Kharkiv Oblast), Чунишине (village, Donetsk Oblast).

Based on the local weekly advance (median ≈ 0.94 km, dynamic buffer 935 m), settlements likely next affected by Russian advances include Даченське (village, Donetsk Oblast) (14 m), Промінь (village, Donetsk Oblast) (111 m), Іванівка (village, Kharkiv Oblast) (172 m), Зелене (village, Donetsk Oblast) (256 m), Успенівка (village, Zaporizhia Oblast) (286 m), Солодке (village, Zaporizhia Oblast) (352 m), Олександро-Калинове (village, Donetsk Oblast) (386 m), Миколаївка (village, Donetsk Oblast) (530 m), Клебан-Бик (village, Donetsk Oblast) (565 m), Яблунівка (village, Donetsk Oblast) (574 m), ... Based on the local weekly retreat (median ≈ 0.04 km, dynamic buffer 500 m), settlements likely next affected by Ukrainian advances include Покровськ (town, Donetsk Oblast) (68 m).

Module 1: Equipment Losses Weekly Comparison (WarSpotting)— Narrative

According to data reported by the WarSpotting project, between 2025-11-10 and 2025-11-16, Russian forces lost 17 pieces of equipment (cumulative total: 21836), representing a decrease of 50.0% compared to the previous week.

The largest increase was seen in Anti-aircraft systems, which rose to 3 units (+3, +0.0%). Meanwhile, Transport losses dropped to 0 units (-8, -100.0%).

 Weekly Retrospective (last 52 weeks):

- Average weekly losses over the past year: 112.0, current week below average (17 units).
- Largest weekly spike: 742 units in week ending 2022-03-28.
- Cumulative total: 21836

Equipment categories with the highest relative increase compared to their yearly average:

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

- Command posts, communication (+372.7%)
- Anti-aircraft systems (+140.0%)
- Infantry fighting vehicles (+57.8%)

Categories with the largest decreases:

- Airplanes (-100.0%)
- Ambulances, medical vehicles (-100.0%)
- Anti-tank systems (-100.0%)

Geolocation data was available for 10 of these losses (58.8%), compared to 21 (61.8%) the week before.

The 80th Tank Regiment recorded the highest number of equipment losses among identifiable Russian units last week. The most frequently reported location was Novopavlivka, Synelnykove raion, indicating sustained or intensified activity in the area.

Module 2: Equipment Losses Weekly Comparison (Oryx)— Narrative with Retrospective & Category Context

According to data reported by the Oryx project, between 2025-11-10 and 2025-11-16, Russian forces lost 47 units (cumulative total: 23391), while Ukrainian forces lost 137 units (cumulative total: 10485). This represents a increase of 0.2% for Russia and a increase of 1.3% for Ukraine compared to the previous week. The RU/UA loss ratio was 2.23, compared to 2.26 the previous week.

 Weekly Retrospective (last 52 weeks):

- Russia: average weekly losses over the past year 11.8, current week above average (47 units), largest weekly spike: 252 units in week ending 2025-10-24.
- Ukraine: average weekly losses over the past year 9.4, current week above average (137 units), largest weekly spike: 236 units in week ending 2025-03-20.
- Cumulative totals: Russia 23391, Ukraine 10485

◆ Per-Category Weekly Context and Top 3 Highlights:

Russia:

- Tanks: 8 (above average 1.8)
- AFV: 5 (above average 1.6)
- IFV: 15 (above average 3.5)
- APC: 1 (above average 0.4)
- IMV: 0 (below average 0.3)
- Engineering: 0 (below average 0.3)
- Coms: 0 (below average 0.0)
- Vehicles: 11 (above average 1.6)
- Aircraft: 1 (above average 0.2)
- Infantry: 16 (above average 4.2)
- Logistics: 0 (below average 0.3)
- Armor: 13 (above average 3.4)

FRONT_BOT is a research prototype for automated military conflict reporting.

Powered entirely by publicly available OSINT datasets and Python-based data analysis pipelines.

⚠ All data is interpreted algorithmically — inaccuracies may occur. Use at your own discretion.

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

- Antiair: 4 (above average 0.3)
- Artillery: 0 (below average 0.4)
- ▲ Top 3 increases this week: Infantry (+11.8), IFV (+11.5), Armor (+9.6)
- ▼ Top 3 decreases this week: Engineering (-0.3), Logistics (-0.3), Artillery (-0.4)

Ukraine:

- Tanks: 11.0 (above average 1.0)
- AFV: 1.0 (above average 0.2)
- IFV: 9.0 (above average 1.1)
- APC: 23.0 (above average 1.5)
- IMV: 45.0 (above average 1.8)
- Engineering: 1.0 (above average 0.2)
- Coms: 3.0 (above average 0.1)
- Vehicles: 9.0 (above average 0.7)
- Aircraft: 0.0 (below average 0.0)
- Infantry: 77.0 (above average 4.5)
- Logistics: 4.0 (above average 0.3)
- Armor: 12.0 (above average 1.2)
- Antiair: 2.0 (above average 0.1)
- Artillery: 19.0 (above average 0.8)
- ▲ Top 3 increases this week: Infantry (+72.5), IMV (+43.2), APC (+21.5)
- ▼ Top 3 decreases this week: Aircraft (-0.0)

Russia units with the highest relative increase compared to their weekly average were Infantry (+11.8), IFV (+11.5), Armor (+9.6). Units showing the largest decreases were Engineering (-0.3), Logistics (-0.3), Artillery (-0.4). This indicates which equipment types were most active or affected on the frontlines this week.

Ukraine units with the highest relative increase compared to their weekly average were Infantry (+72.5), IMV (+43.2), APC (+21.5). Units showing the largest decreases were Aircraft (-0.0). This indicates which equipment types were most active or affected on the frontlines this week.

Module 3: Occupation Change Analysis (DeepStateMap) — Narrative

According to data reported by the DeepStateMap project, as of 2025-11-16, Russian forces occupy approximately 95767.99 km² in Ukraine, which is 15.93% of the country's total territory. In the last 7 days, the occupied territory has increased by 161.43 km², a growth of 0.03%. Luhansk Oblast has 26548.29 km² occupied, accounting for 99.52% of its territory, which changed by 0.00 km² (0.00%) over the past week. Autonomous Republic of Crimea has 26846.21 km² occupied, accounting for 98.96% of its territory, which changed by 0.00 km² (0.00%) over the past week. Donetsk Oblast has 20324.86 km² occupied, accounting for 76.15% of its territory, which changed by 53.19 km² (0.20%) over the past week.

Module 4: Settlements (DeepStateMap) — Narrative - Future

Settlements likely to be next affected based on current frontline dynamics:

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

- Potentially threatened by Russian advance (avg advance ≈ 0.94 km, buffer 935 m):

- Даченське (village, Donetsk Oblast) (14 m)
- Промінь (village, Donetsk Oblast) (111 m)
- Іванівка (village, Kharkiv Oblast) (172 m)
- Зелене (village, Donetsk Oblast) (256 m)
- Успенівка (village, Zaporizhia Oblast) (286 m)
- Солодке (village, Zaporizhia Oblast) (352 m)
- Олександрівка (village, Donetsk Oblast) (386 m)
- Миколаївка (village, Donetsk Oblast) (530 m)
- Клебан-Бик (village, Donetsk Oblast) (565 m)
- Яблунівка (village, Donetsk Oblast) (574 m)
- Злагода (village, Dnipropetrovsk Oblast) (594 m)
- Майське (village, Donetsk Oblast) (764 m)
- Гнатівка (village, Donetsk Oblast) (932 m)

- Potentially threatened by Ukrainian advance (avg retreat ≈ 0.04 km, buffer 500 m):

- Покровськ (town, Donetsk Oblast) (68 m)

Module 5: Settlements (DeepStateMap) — Narrative

This briefing focuses on Ukraine overall and on oblasts where occupation levels are between 2% and 95%. Oblasts with less than 2% occupation or more than 95% occupation are excluded from this analysis.

As of the latest update, Ukraine overall is 15.9% occupied. At the current weekly pace, full occupation of Ukraine would take approximately 3130.6 weeks, or about 60.2 years.

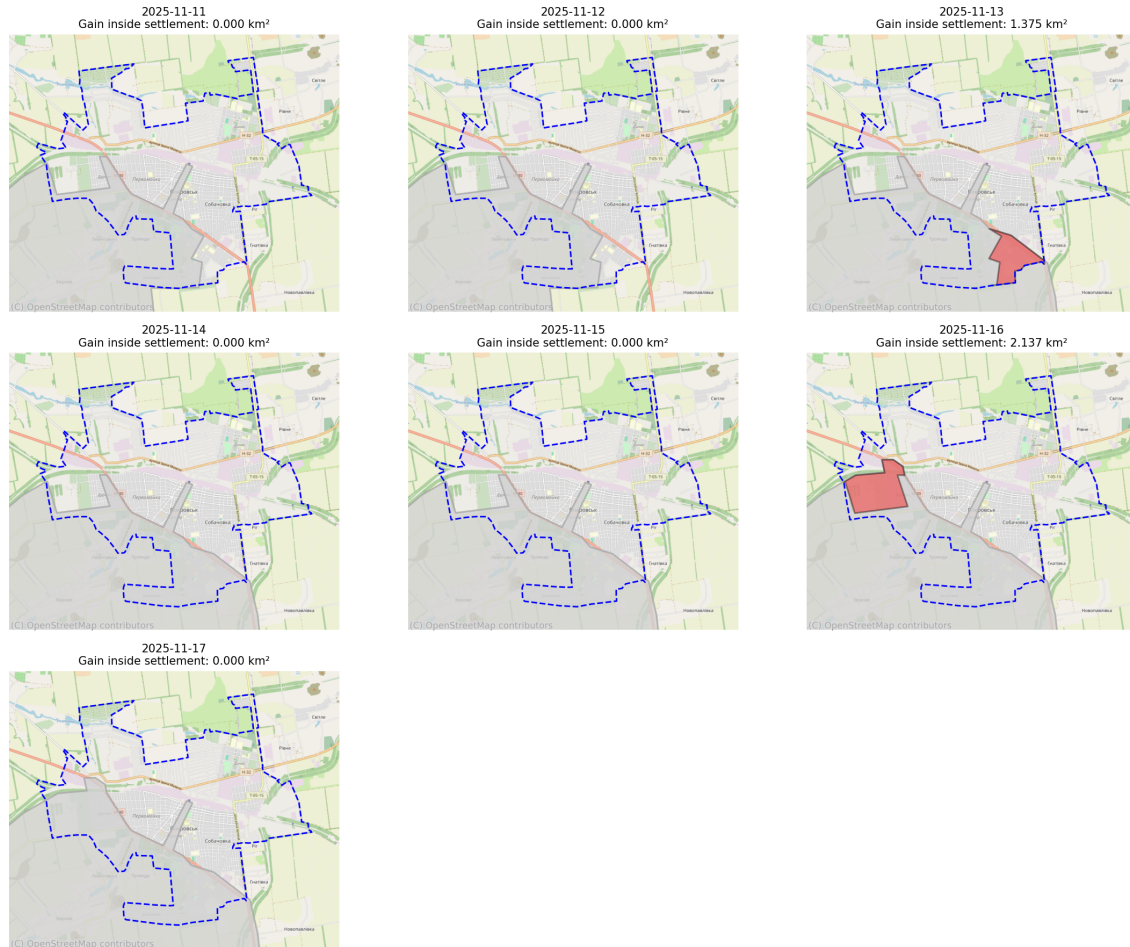

Key oblasts under partial occupation:

Donetsk Oblast is currently 76.2% occupied. Over the past week, the occupied area changed by 53.2 km² (0.20%). current trends suggest full occupation could occur in approximately 119.7 weeks (~2.3 years). Zaporizhia Oblast is currently 74.2% occupied. Over the past week, the occupied area changed by 81.0 km² (0.30%). current trends suggest full occupation could occur in approximately 86.4 weeks (~1.7 years). Kharkiv Oblast is currently 4.6% occupied. Over the past week, the occupied area changed by 20.5 km² (0.06%). current trends suggest full occupation could occur in approximately 1475.0 weeks (~28.4 years).

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Module 10: Settlement level - Покровськ (DeepStateMap)

Summary Report (Покровськ)

According to DeepStateMap data between 2025-11-11 and 2025-11-17, the following territorial developments were observed within the settlement of Покровськ.

The settlement covers a total area of approximately 31.17 km². As of the latest reporting date (2025-11-17), around 9.49 km² of its territory is under occupation, representing roughly 30.4% of the entire settlement.

The frontline first entered Покровськ on 2025-09-29. Over the past seven days, territorial gains within the settlement amounted to 3.51 km².

The largest single-day advance occurred on 2025-11-16, with approximately 2.14 km² gained. The smallest daily gain was recorded on 2025-11-11, with an increase of 0.00 km².

Daily gains inside settlement (Покровськ)

2025-11-11 — Gain inside settlement: 0.000 km²
2025-11-12 — Gain inside settlement: 0.000 km²
2025-11-13 — Gain inside settlement: 1.375 km²

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

2025-11-14 — Gain inside settlement: 0.000 km²
2025-11-15 — Gain inside settlement: 0.000 km²
2025-11-16 — Gain inside settlement: 2.137 km²
2025-11-17 — Gain inside settlement: 0.000 km²

RAW DATA REPORTS

Module 1: Equipment Losses Weekly Comparison (WarSpotting)— RAW

 Equipment Losses Report (2025-11-10 to 2025-11-16):

- Total reported equipment losses: 17 ( 17 from previous week, -50.0%)

◆ Breakdown by equipment type:

- Anti-aircraft systems: 3 ( +3, +0.0%)
- Command posts, communication: 1 ( +0, +0.0%)
- Infantry fighting vehicles: 13 ( -2, -13.3%)
- Other: 0 ( -1, -100.0%)
- Rocket and missile artillery: 0 ( -2, -100.0%)
- Tanks: 0 ( -7, -100.0%)
- Transport: 0 ( -8, -100.0%)

 Geolocation Summary:

- Last week: 10 geolocated out of 17 (58.8%)
- Previous week: 21 geolocated out of 34 (61.8%)

 Units Most Affected (Last Week):

- 80th Tank Regiment: 3 losses

 Locations with Most Losses (Last Week):

- Novopavlivka, Synelnykove raion: 5 losses
- Rusyn Yar, Kramatorsk raion: 4 losses
- Novorossiysk, Krasnodar krai: 2 losses

Module 2: Equipment Losses Weekly Comparison (Oryx)— RAW

 Weekly Equipment Losses Report (2025-11-10 to 2025-11-16):

 Russia (cumulative): 23391 (Δ +47, +0.2%)

 Ukraine (cumulative): 10485 (Δ +137, +1.3%)

 RU/UA Ratio: 2.23 (prev 2.26)

◆ Breakdown by equipment type (Russia, weekly increments):

- Tanks: 8 ( +2, +33.3%)
- AFV: 5 ( +0, +0.0%)
- IFV: 15 ( +8, +114.3%)
- APC: 1 ( +1, +0.0%)
- IMV: 0 ( +0, +0.0%)
- Engineering: 0 ( -1, -100.0%)

Module 3: Occupation Change Analysis (DeepStateMap) — Detailed

Occupation report for Ukraine comparing 2025-11-09 to 2025-11-16:

Overall, occupied territory has increased by 161.43 km² (0.03 percentage points).

Top 3 oblasts with increased occupation:

- Zaporizhia Oblast: +80.95 km² (0.30%)
- Donetsk Oblast: +53.19 km² (0.20%)
- Kharkiv Oblast: +20.51 km² (0.06%)

Top 3 oblasts with decreased occupation:

- Luhansk Oblast: 0.00 km² (0.00%)
- Autonomous Republic of Crimea: 0.00 km² (0.00%)
- Sumy Oblast: 0.00 km² (0.00%)

Oblasts with significant occupation (>10% occupied):

- Luhansk Oblast: 99.52%
- Autonomous Republic of Crimea: 98.96%
- Donetsk Oblast: 76.15%
- Zaporizhia Oblast: 74.18%
