WEEKLY TERRITORIAL CHANGES

Module 7: Weekly Territorial Change Report (DeepStateMap)

According to DeepStateMap data, between 2025-11-05 and 2025-11-09, Russian and Ukrainian forces continued to contest territory along multiple fronts. Over this 7-day period, Russian gains amounted to 80.3 km², while Ukrainian gains reached 0.7 km². The largest Russian advances were observed in Kharkiv Oblast (37.8 km²), Donetsk Oblast (28.2 km²), Zaporizhia Oblast (7.4 km²). Meanwhile, Ukrainian forces achieved their most notable gains in Donetsk Oblast (0.7 km²), Kharkiv Oblast (0.0 km²), Dnipropetrovsk Oblast (0.0 km²). Overall, the most active oblasts during the week were Kharkiv Oblast, Donetsk Oblast, Zaporizhia Oblast. The peak day for Russian advances was 2025-11-06, while the peak day for Ukrainian advances was 2025-11-06.

Distribution of Gains by Oblast (Last 7 Days)

RUS Gains (80.3 km²)

UKR Gains (0.7 km²)

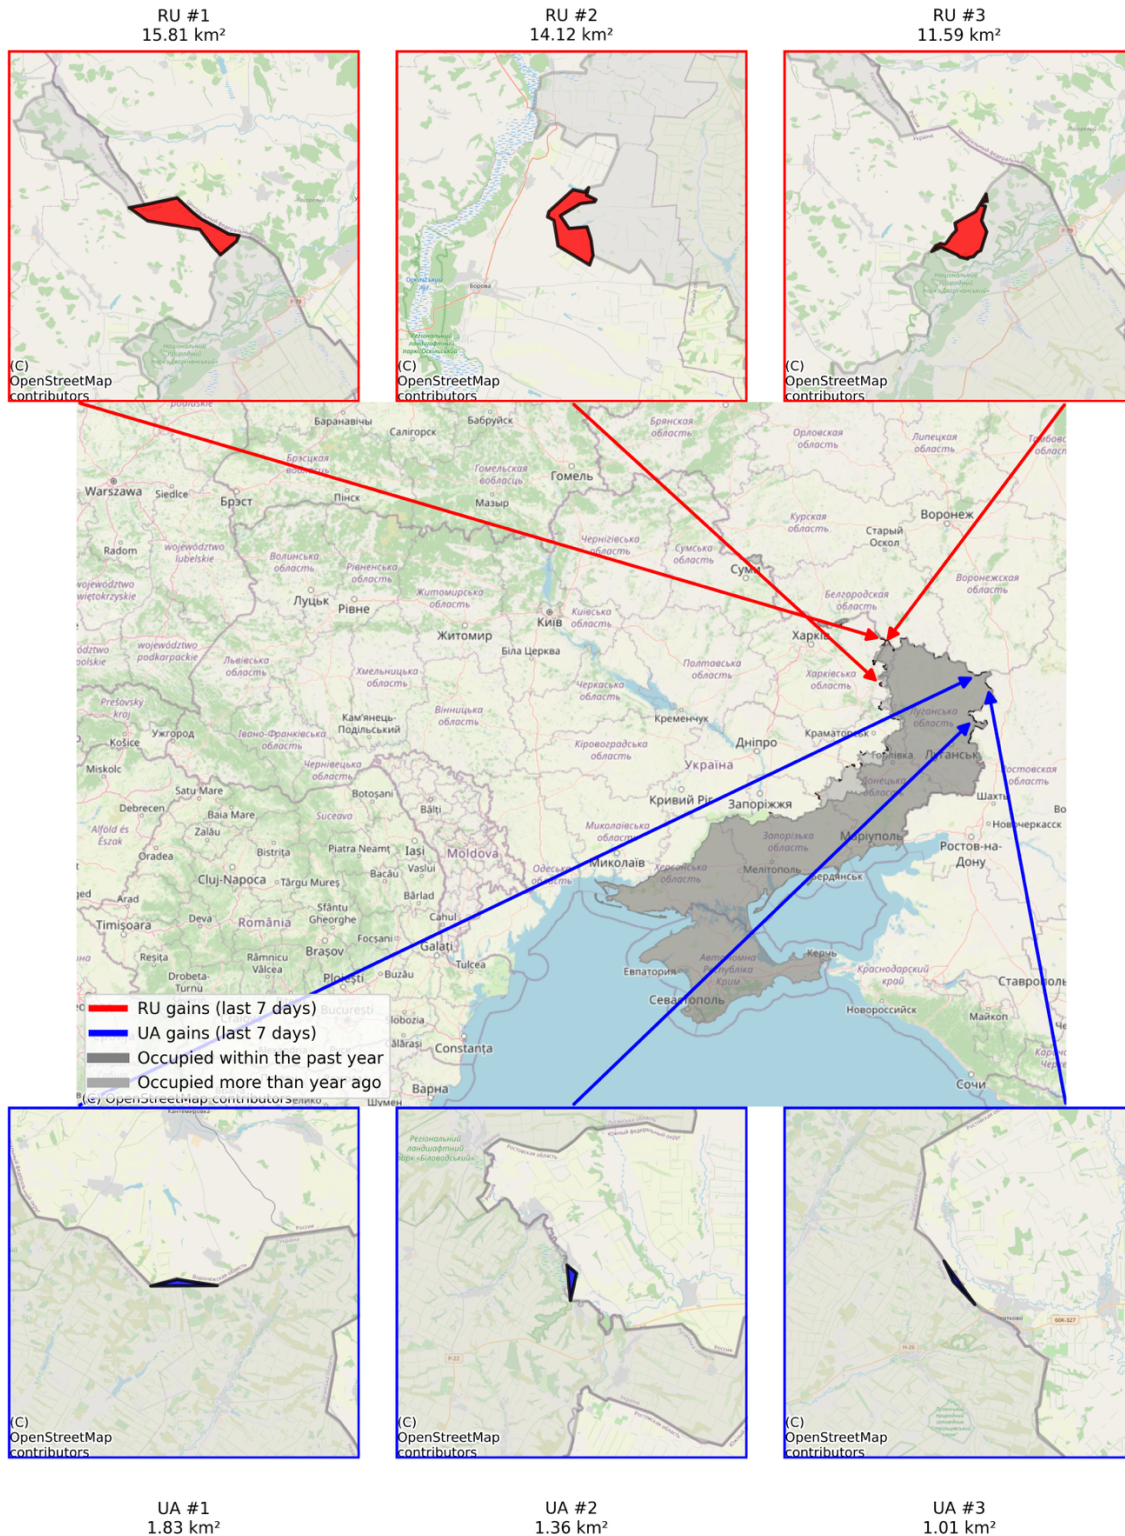

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

Module 8: Weekly Territorial Map (DeepStateMap)

Last 7 Days | RU Gains 110.17 km² | UA Gains 10.32 km²
Top 3 territorial changes shown on side maps

Module 9: Top 3 Territorial Maps & Narratives (DeepStateMap)

RU Narrative:

According to DeepStateMap data between 2025-11-02 and 2025-11-09, the following territorial developments were observed for RU forces.

7-Day Comparative Summary

Over the past week, RU forces have gained a total of 110.17 km², with the top three territorial gains accounting for 41.53 km² (38% of the total). In comparison, the opposing side has gained 10.32 km² (top three gains: 4.19 km²).

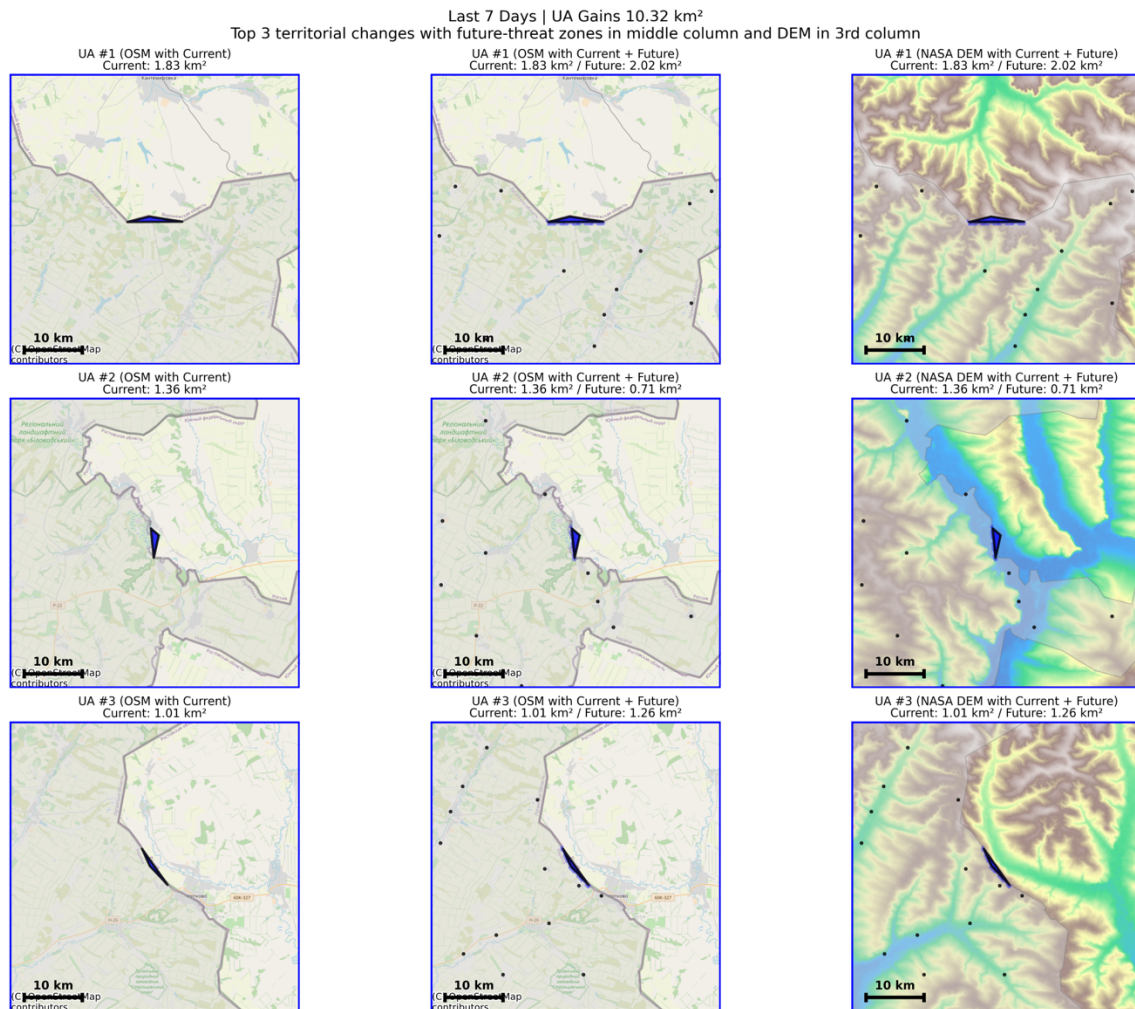

RU Top Territorial Changes Narrative

The #1 largest gain by RU forces covers approximately 15.81 km², which represents about 14% of total gains this week. Currently, no settlements are affected by this gain. If the advance continues, the following settlements may soon fall within the contested area: Бологівка, Стрївка. The #2 largest gain by RU forces covers approximately 14.12 km², which represents about 13% of total gains this week. Currently, no settlements are affected by this gain. If the advance continues, the settlement Борівська Андріївка may soon fall within the contested area. The #3 largest gain by RU forces covers approximately 11.59 km², which represents about

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

11% of total gains this week. Currently, no settlements are affected by this gain. If the advance continues, the settlement Кам'янка may soon fall within the contested area.

UA Narrative:

According to DeepStateMap data between 2025-11-02 and 2025-11-09, the following territorial developments were observed for UA forces.

7-Day Comparative Summary

Over the past week, UA forces have gained a total of 10.32 km², with the top three territorial gains accounting for 4.19 km² (41% of the total). In comparison, the opposing side has gained 110.17 km² (top three gains: 41.53 km²).

UA Top Territorial Changes Narrative

The #1 largest gain by UA forces covers approximately 1.83 km², which represents about 18% of total gains this week. Currently, no settlements are affected by this gain. No additional settlements are predicted to be affected in the near future. The #2 largest gain by UA forces covers approximately 1.36 km², which represents about 13% of total gains this week. Currently, no settlements are affected by this gain. No additional settlements are predicted to be affected

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

in the near future. The #3 largest gain by UA forces covers approximately 1.01 km², which represents about 10% of total gains this week. Currently, no settlements are affected by this gain. No additional settlements are predicted to be affected in the near future.

Module 4: Settlements (DeepStateMap) — Narrative

According to data reported by the DeepStateMap project, between 2025-11-03 to 2025-11-09, the following territorial developments were observed:

Russian forces expanded their control between 2025-11-03 to 2025-11-09, with Russia gaining 256.0 km² (55.0% more than the previous week, which was 165.1 km²), and Ukraine gaining 32.8 km² (35.7% less than the previous week, which was 51.1 km²). The most occupied oblast was Donetsk Oblast (Троянда). Newly occupied settlements include: Павлівка (village, Zaporizhia Oblast), Троянда (village, Donetsk Oblast).

Based on the local weekly advance (median ≈ 0.05 km, dynamic buffer 500 m), settlements likely next affected by Russian advances include Покровськ (town, Donetsk Oblast) (68 m), Леонтовичі (village, Donetsk Oblast) (92 m), Куп'янськ (town, Kharkiv Oblast) (156 m), Успенівка (village, Zaporizhia Oblast) (181 m), Борівська Андріївка (village, Kharkiv Oblast) (258 m), Козацьке (village, Donetsk Oblast) (283 m), Голубівка (village, Kharkiv Oblast) (475 m). Based on the local weekly retreat (median ≈ 0.02 km, dynamic buffer 500 m), settlements likely next affected by Ukrainian advances include Середнє (village, Donetsk Oblast) (313 m), Куп'янськ (town, Kharkiv Oblast) (320 m).

Module 1: Equipment Losses Weekly Comparison (WarSpotting)— Narrative

According to data reported by the WarSpotting project, between 2025-11-03 and 2025-11-09, Russian forces lost 21 pieces of equipment (cumulative total: 21792), representing a decrease of 40.0% compared to the previous week.

The largest increase was seen in Rocket and missile artillery, which rose to 2 units (+2, +0.0%). Meanwhile, Infantry fighting vehicles losses dropped to 8 units (-14, -63.6%).

 Weekly Retrospective (last 52 weeks):

- Average weekly losses over the past year: 112.3, current week below average (21 units).
- Largest weekly spike: 742 units in week ending 2022-03-28.
- Cumulative total: 21792

Equipment categories with the highest relative increase compared to their yearly average:

- Command posts, communication (+420.0%)
- Other (+116.7%)
- Rocket and missile artillery (+14.3%)

Categories with the largest decreases:

- Airplanes (-100.0%)

FRONT_BOT is a research prototype for automated military conflict reporting.

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

- Ambulances, medical vehicles (-100.0%)
- Anti-aircraft systems (-100.0%)

Geolocation data was available for 12 of these losses (57.1%), compared to 26 (74.3%) the week before.

The most frequently reported location was Yalta, Volnovakha raion, indicating sustained or intensified activity in the area.

Module 2: Equipment Losses Weekly Comparison (Oryx)— Narrative with Retrospective & Category Context

According to data reported by the Oryx project, between 2025-11-03 and 2025-11-09, Russian forces lost 37 units (cumulative total: 23344), while Ukrainian forces lost 69 units (cumulative total: 10348). This represents a increase of 0.2% for Russia and a increase of 0.7% for Ukraine compared to the previous week. The RU/UA loss ratio was 2.26, compared to 2.27 the previous week.

Weekly Retrospective (last 52 weeks):

- Russia: average weekly losses over the past year 12.0, current week above average (37 units), largest weekly spike: 252 units in week ending 2025-10-24.
- Ukraine: average weekly losses over the past year 9.1, current week above average (69 units), largest weekly spike: 236 units in week ending 2025-03-20.
- Cumulative totals: Russia 23344, Ukraine 10348

◆ Per-Category Weekly Context and Top 3 Highlights:

Russia:

- Tanks: 6 (above average 1.8)
- AFV: 5 (above average 1.6)
- IFV: 7 (above average 3.6)
- APC: 0 (below average 0.4)
- IMV: 0 (below average 0.3)
- Engineering: 1 (above average 0.3)
- Coms: 1 (above average 0.0)
- Vehicles: 7 (above average 1.6)
- Aircraft: 0 (below average 0.2)
- Infantry: 7 (above average 4.3)
- Logistics: 2 (above average 0.3)
- Armor: 11 (above average 3.4)
- Anti-air: 1 (above average 0.3)
- Artillery: 2 (above average 0.4)
- ▲ Top 3 increases this week: Armor (+7.6), Vehicles (+5.4), Tanks (+4.2)
- ▼ Top 3 decreases this week: Aircraft (-0.2), IMV (-0.3), APC (-0.4)

Ukraine:

- Tanks: 5.0 (above average 1.0)

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

- AFV: 0.0 (below average 0.2)
- IFV: 6.0 (above average 1.1)
- APC: 7.0 (above average 1.5)
- IMV: 18.0 (above average 1.7)
- Engineering: 0.0 (below average 0.2)
- Coms: 0.0 (below average 0.1)
- Vehicles: 7.0 (above average 0.7)
- Aircraft: 0.0 (below average 0.0)
- Infantry: 31.0 (above average 4.3)
- Logistics: 0.0 (below average 0.3)
- Armor: 5.0 (above average 1.2)
- Antiair: 1.0 (above average 0.1)
- Artillery: 10.0 (above average 0.7)
- ▲ Top 3 increases this week: Infantry (+26.7), IMV (+16.3), Artillery (+9.3)
- ▼ Top 3 decreases this week: Engineering (-0.2), AFV (-0.2), Logistics (-0.3)

Russia units with the highest relative increase compared to their weekly average were Armor (+7.6), Vehicles (+5.4), Tanks (+4.2). Units showing the largest decreases were Aircraft (-0.2), IMV (-0.3), APC (-0.4). This indicates which equipment types were most active or affected on the frontlines this week.

Ukraine units with the highest relative increase compared to their weekly average were Infantry (+26.7), IMV (+16.3), Artillery (+9.3). Units showing the largest decreases were Engineering (-0.2), AFV (-0.2), Logistics (-0.3). This indicates which equipment types were most active or affected on the frontlines this week.

Module 3: Occupation Change Analysis (DeepStateMap) — Narrative

According to data reported by the DeepStateMap project, as of 2025-11-09, Russian forces occupy approximately 95606.56 km² in Ukraine, which is 15.90% of the country's total territory. In the last 7 days, the occupied territory has increased by 98.86 km², a growth of 0.02%. Luhansk Oblast has 26548.29 km² occupied, accounting for 99.52% of its territory, which changed by -0.59 km² (-0.00%) over the past week. Autonomous Republic of Crimea has 26846.21 km² occupied, accounting for 98.96% of its territory, which changed by 0.00 km² (0.00%) over the past week. Donetsk Oblast has 20271.67 km² occupied, accounting for 75.95% of its territory, which changed by 32.90 km² (0.12%) over the past week.

Module 4: Settlements (DeepStateMap) — Narrative - Future

Settlements likely to be next affected based on current frontline dynamics:

- Potentially threatened by Russian advance (avg advance ≈ 0.05 km, buffer 500 m):
 - Покровськ (town, Donetsk Oblast) (68 m)
 - Леонтовичі (village, Donetsk Oblast) (92 m)
 - Куп'янськ (town, Kharkiv Oblast) (156 m)
 - Успенівка (village, Zaporizhia Oblast) (181 m)
 - Борівська Андріївка (village, Kharkiv Oblast) (258 m)

FRONT_BOT (Frontline Reporting & OSINT Node Tracker Bot)

Developed by Zsolt Lazar – OSINT Homelab

- Козацьке (village, Donetsk Oblast) (283 m)
 - Голубівка (village, Kharkiv Oblast) (475 m)
- Potentially threatened by Ukrainian advance (avg retreat $\approx$ 0.02 km, buffer 500 m):
- Середнє (village, Donetsk Oblast) (313 m)
 - Куп'янськ (town, Kharkiv Oblast) (320 m)

Module 5: Settlements (DeepStateMap) — Narrative

This briefing focuses on Ukraine overall and on oblasts where occupation levels are between 2% and 95%. Oblasts with less than 2% occupation or more than 95% occupation are excluded from this analysis.

As of the latest update, Ukraine overall is 15.9% occupied. At the current weekly pace, full occupation of Ukraine would take approximately 5113.5 weeks, or about 98.3 years.

Key oblasts under partial occupation:

Donetsk Oblast is currently 76.0% occupied. Over the past week, the occupied area changed by 32.9 km² (0.12%). current trends suggest full occupation could occur in approximately 195.1 weeks (~3.8 years). Zaporizhia Oblast is currently 73.9% occupied. Over the past week, the occupied area changed by 13.3 km² (0.05%). current trends suggest full occupation could occur in approximately 531.1 weeks (~10.2 years). Kharkiv Oblast is currently 4.5% occupied. Over the past week, the occupied area changed by 46.4 km² (0.15%). current trends suggest full occupation could occur in approximately 653.1 weeks (~12.6 years).

RAW DATA REPORTS

Module 1: Equipment Losses Weekly Comparison (WarSpotting)— RAW

 Equipment Losses Report (2025-11-03 to 2025-11-09):

- Total reported equipment losses: 21 ( 14 from previous week, -40.0%)

◆ Breakdown by equipment type:

- Anti-aircraft systems: 0 ( -1, -100.0%)
- Command posts, communication: 1 ( +0, +0.0%)
- Drones: 0 ( -1, -100.0%)
- Infantry fighting vehicles: 8 ( -14, -63.6%)
- Other: 1 ( -1, -50.0%)
- Radars, jammers: 0 ( -1, -100.0%)
- Rocket and missile artillery: 2 ( +2, +0.0%)
- Tanks: 4 ( +0, +0.0%)
- Transport: 5 ( +2, +66.7%)

 Geolocation Summary:

- Last week: 12 geolocated out of 21 (57.1%)
- Previous week: 26 geolocated out of 35 (74.3%)

 Units Most Affected (Last Week):

 Locations with Most Losses (Last Week):

- Yalta, Volnovakha raion: 4 losses
- Razine, Pokrovsk raion: 3 losses
- Kursk oblast: 2 losses

Module 2: Equipment Losses Weekly Comparison (Oryx)— RAW

 Weekly Equipment Losses Report (2025-11-03 to 2025-11-09):

 Russia (cumulative): 23344 (Δ +37, +0.2%)

 Ukraine (cumulative): 10348 (Δ +69, +0.7%)

 RU/UA Ratio: 2.26 (prev 2.27)

◆ Breakdown by equipment type (Russia, weekly increments):

- Tanks: 6 ( -6, -50.0%)
- AFV: 5 ( -13, -72.2%)
- IFV: 7 ( -31, -81.6%)
- APC: 0 ( -1, -100.0%)
- IMV: 0 ( -1, -100.0%)

Module 3: Occupation Change Analysis (DeepStateMap) — Detailed

Occupation report for Ukraine comparing 2025-11-02 to 2025-11-09:

Overall, occupied territory has increased by 98.86 km² (0.02 percentage points).

Top 3 oblasts with increased occupation:

- Kharkiv Oblast: +46.36 km² (0.15%)
- Donetsk Oblast: +32.90 km² (0.12%)
- Zaporizhia Oblast: +13.32 km² (0.05%)

Top 3 oblasts with decreased occupation:

- Luhansk Oblast: -0.59 km² (-0.00%)
- Autonomous Republic of Crimea: 0.00 km² (0.00%)
- Sumy Oblast: 0.00 km² (0.00%)

Oblasts with significant occupation (>10% occupied):

- Luhansk Oblast: 99.52%
- Autonomous Republic of Crimea: 98.96%
- Donetsk Oblast: 75.95%
- Zaporizhia Oblast: 73.89%
